

When XM had the opportunity to release the weather and live traffic option it was a excellent idea. Just think with the traffic option all XM subscribers can listen and stay away from the areas that may have a wreck or traffic jam. I would think this would assist in the police that is in that area where there would be less trafic and less people in the area where they could possibly repsond faster and get the situation cleaned up faster. If this is taken away from XM they should also stop where cities have cameras mounted and you can see the traffic on your TV. What XM offers is like this so why stop it.
